## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 5166859 to Ueno.

Ueno discloses laminating a plurality of ceramic greens sheets (1a-c) one on to top of the other, at least some of the ceramic green sheets (1a-c) having a conductive paste 2 on a surface thereof such that the conductive paste 2 is located between two adjacent ceramic green sheets (1a-c), baking the laminated product (see col. 5, lines 25-37) to obtain the electronic part, the contraction ratio of the ceramic material forming the ceramic green sheets (1a-c) being greater than the contraction ratio of the conductive paste 2 (see Fig 2 and col. 26, lines 35-45 respectively). Note: *the ceramic material's contraction ratio is interpreted to be larger and Ueno changes the paste's contraction ratio to be closer to the ceramic material.*

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following patents are cited to show the state of the art in the method of

producing a ceramic electronic part.

US Patent No. 4,875,136 to Sano

Japanese Patent No. 10-199752 to Ogose
